Springer Series in Measurement Science and Technology

Series Editors: M.G. Cain, G.B. Rossi, J. Tesař, M. van Veghel, K.-Y. Jhang

The Springer Series in Measurement Science and Technology comprehensively covers the science and technology of measurement, addressing all aspects of the subject from the fundamental physical principles through to the state-of-the-art in applied and industrial metrology. Volumes published in the series cover theoretical developments, experimental techniques and measurement best practice, devices and technology, data analysis, uncertainty, and standards, with application to physics, chemistry, materials science, engineering and the life sciences. The series includes textbooks for advanced students and research monographs for established researchers needing to stay up to date with the latest developments in the field.
