

Soft biomimetic robots

Turtle robot

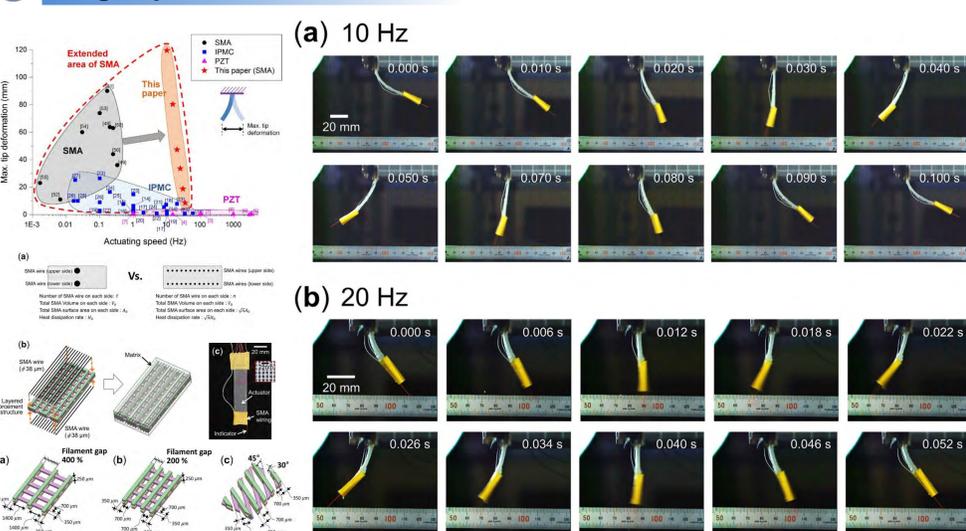

Ray robot

S.H. Song, S.H. Ahn *et al.*, Turtle mimetic soft robot with two swimming gaits, *Bioinspir. Biomim.*, 2016

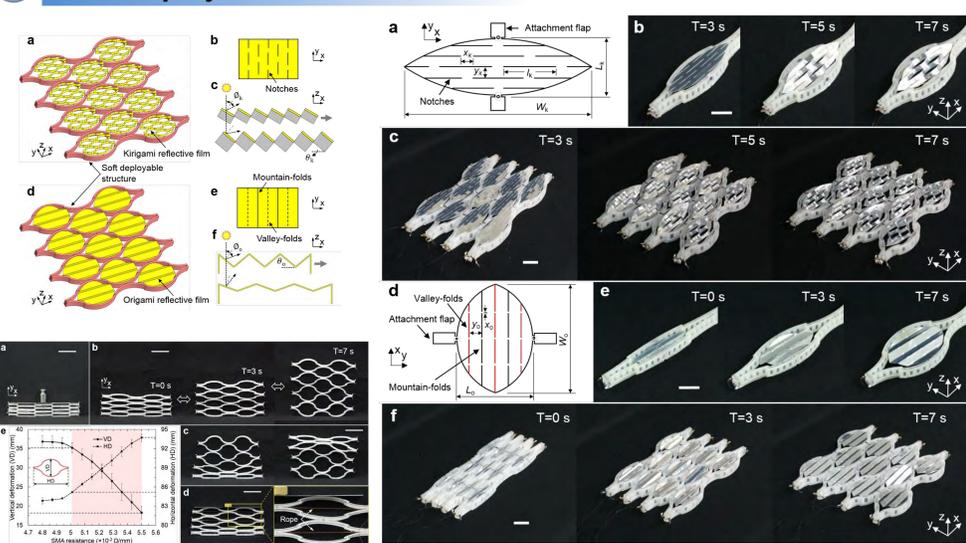

H.S. Kim, S.H. Ahn *et al.*, Design and Fabrication of Multi-actuator Soft Morphing Ray Robot, *Soft Robotics*, 2017

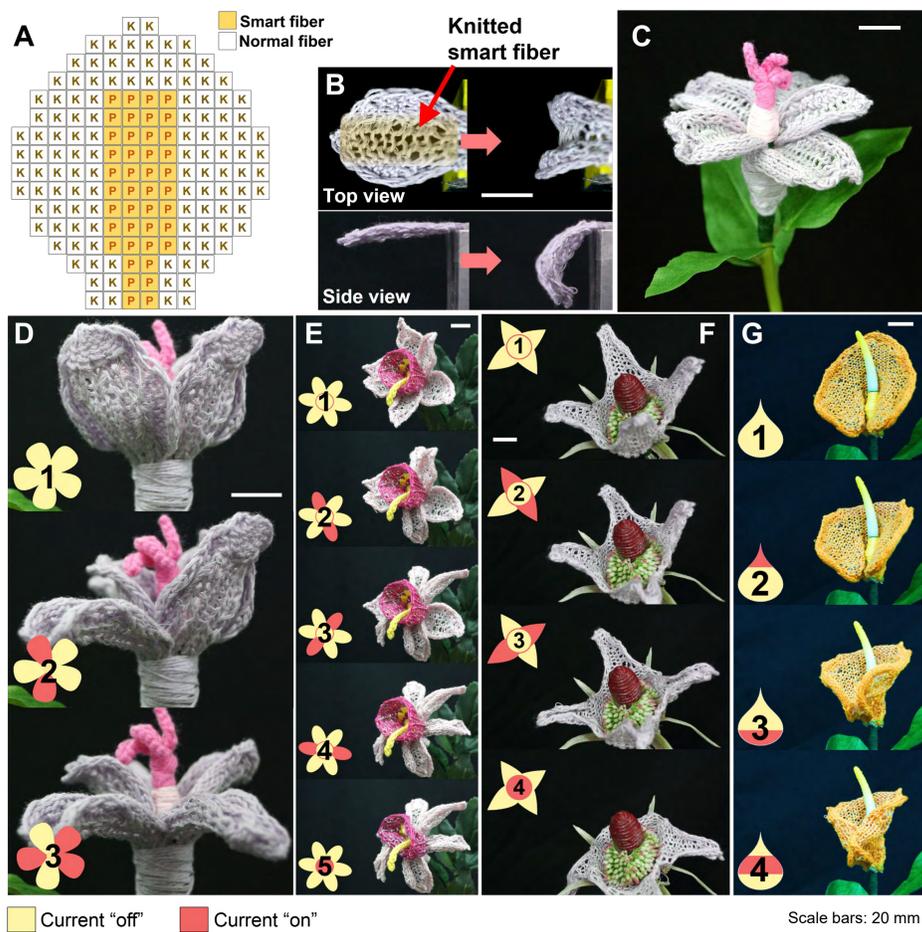

High speed actuators

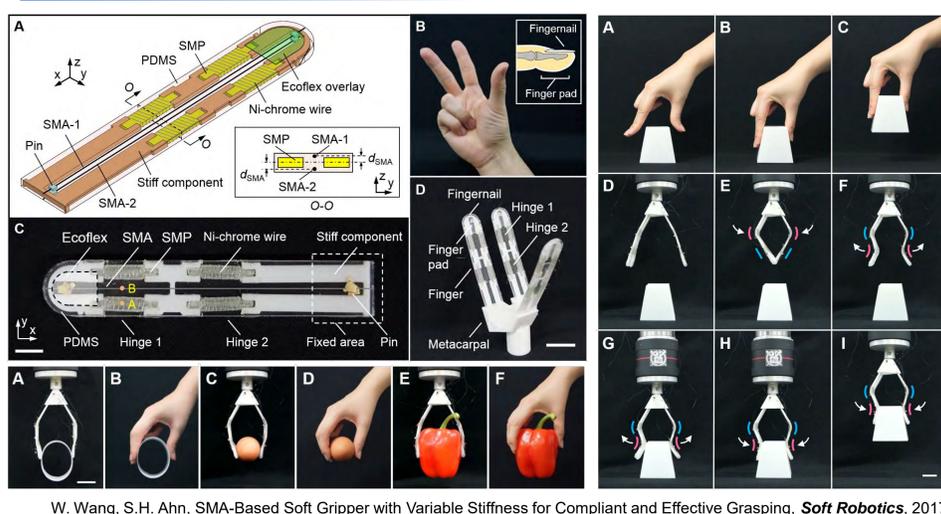

Soft deployable reflector

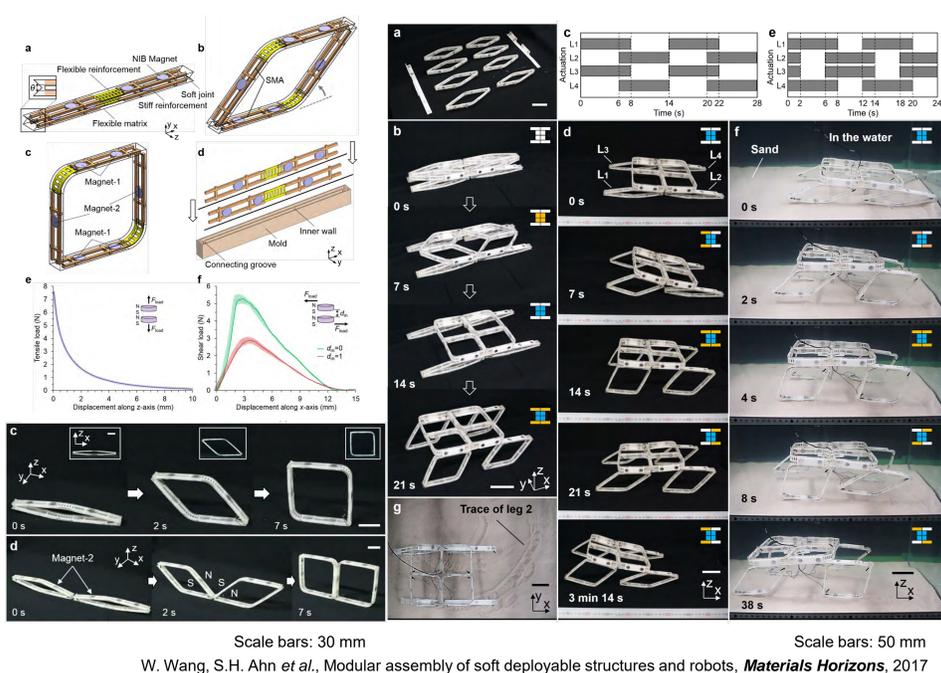

Loop-Linked Soft Morphing Structures

Soft Manipulators

Modularized Soft Structures

Acknowledgements

- Most of the research works were finished in SNU IDIM lab under the instruction of Prof. Sung-Hoon Ahn.
- If you are interested in the related research work, please find more information in the published research papers.
- Soft robotics Lab @ Hanyang** is looking for highly motivated students to participate in our research to create more innovative technologies and to push back the frontier of the field.
- Please feel free to contact us by Email (davidwang@hanyang.ac.kr) or to visit us directly.
